Network’s Lab.

Instructor: Masoud Asghari

Session: 1

Lab’s Outline

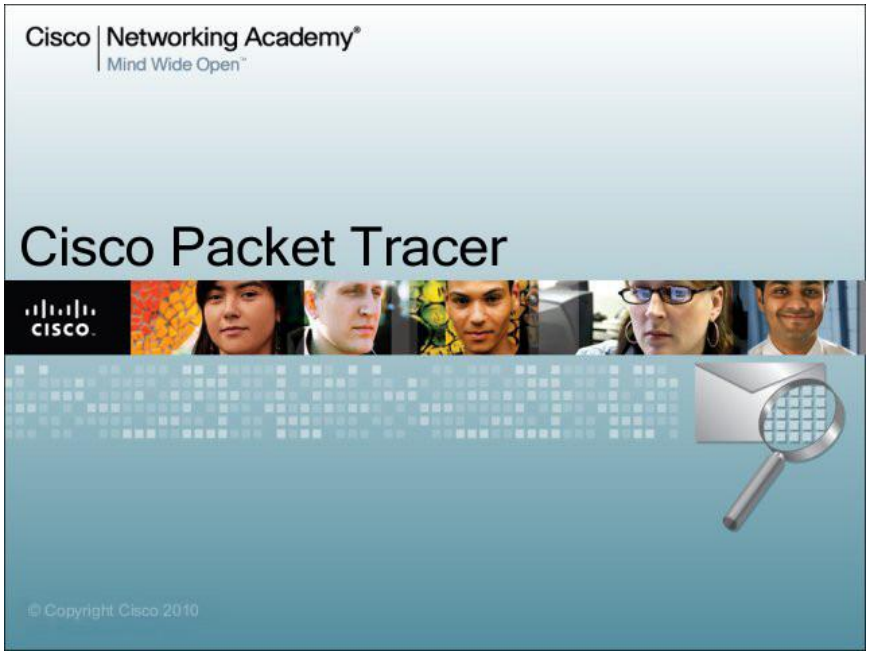
- Cisco packet tracer
  - Introduction (getting started)
  - Simple switch LAN, IOS starting, Spanning tree protocol
  - VLan in switches
  - Introducing routers and L3 switches, static routes
  - Inter VLAN Routing
  - DHCP and NAT
- Cisco Switches config show case!!
- Network Wiring
- Wire Shark and windows networking.

Lab's Marks

- Lab Work: ~10
  - At the end of each session, a simple exercise that is related to that session is given that students (groups 1 to 3 persons) should do at the lab.
- Home works: ~2
  - Some home works might be given that students should do individually and deliver at the next session.
- Final Project: ~8
  - A scenario will be given for a network config at packet tracer
  - It should be done individually and emailed the packet tracer file

- Note: More than 3 absents results in course elimination.

Getting started with Cisco packet tracer



- Please follow tutorial videos of the cisco packet tracer (available with the installation).
- These videos are also described at the Persian book “Net_Lab_Book_1388_Bakhtiyari_Javan.pdf”

Getting started

- Page 50 of Persian BOOK
- follow videos at:
- C:\Program Files (x86)\Cisco Packet Tracer 6.2sv\help\default\tutorials\GettingStarted
- Videos 1 to 2.

My First Packet Tracer Lab

- Page 56 of Persian BOOK
- follow videos at:
- C:\Program Files (x86)\Cisco Packet Tracer 6.2sv\help\default\tutorials\MyFirstPTLab
- Videos 1 to 7.

The Logical Workspace

- Page 64 of Persian BOOK
- follow videos at:
- C:\Program Files (x86)\Cisco Packet Tracer 6.2sv\help\default\tutorials\LogicalWorkspace
- Videos 1 to 4.

The Physical Workspace

- Page 71 of Persian BOOK
- follow videos at:
- C:\Program Files (x86)\Cisco Packet Tracer 6.2sv\help\default\tutorials\PhysicalWorkspace
- Videos 1 to 4.

Need to do for the next session

1. Learn how to use packet tracer by watching videos or reading the Farsi book

2. Learn and Work with *ping* and *tracert* commands

3. Learn and Work with nslookup command

No need to bring any thing, but you need to learn them to fulfill next session's experiments
