Network’s Lab.

Instructor: Masoud Asghari

Project Declaration

Project of the Lab.

- Design an imaginary LAN for a university or a company which has many floors and different sections.
- You need to have VLANs and inter-vlan routing
- You need to include most of the scenarios of the LAB in the project.
- There should be at least 6 switches and 6 VLANs and lots of wired and wireless computers, a web, ftp and DNS servers.

- For extra mark, find new features such as DHCP server and add to the project. You should also mention it in your report.

- Email the pkt file with a short report (pdf file) of the scenario and what novelties you have used.
